

☑ **Start Backend Server**

📁 **Step 1: Navigate to the backend/server directory**

```
cd househunt-backend
```

Or if your backend folder is named server, then:

```
cd server
```

📦 **Step 2: Install dependencies (if not done yet)**

```
npm install
```

🚀 **Step 3: Start the backend server**

```
npm start
```

☑ This will usually run your server on:

<http://localhost:5000>
